

**E**very year, there are more than 500,000 residential fires reported. Unfortunately, more than 4,000 people die in home fires each year. Residential fires are also the number one cause of firefighter fatalities. With this in mind, the Lisle-Woodridge Fire District has developed a checklist that highlights steps you can take to provide a safer living environment for your family. If you have any questions or concerns while completing this checklist, or if you would like a firefighter to assist you in completing this checklist, simply call the Fire Prevention Bureau at (630) 515-3168 to have your questions answered or to schedule an appointment.
