

POINTS TO PONDER

Tollway Response

Tollway emergency responses are of the most dangerous operations for emergency companies.

When operating on the tollway remember a few things:

When responding:

- ✓ Use the left lane as your lane of travel
- ✓ Use defensive driving techniques
- ✓ Anticipate the movement of the vehicles around you – approaching from the front and the rear
- ✓ Use the closest on and off ramps when responding to the tollway

Turnarounds

- ✓ **Using a turnaround is the most dangerous maneuver on a tollway**
- ✓ Using the turnaround causes secondary accidents on the tollway
- ✓ Turnarounds are to be used **only** as a last resort!

Vehicle Placement & Scene Management

- ✓ Protect the incident scene
- ✓ Take a defensive position
- ✓ Protect the working companies - Personnel & Vehicles
- ✓ Detour traffic away from the work zone with the use of the cones

High Visibility Clothing (Vest and Coats) are MANDATORY!

Never turn your back to oncoming traffic!

Clear the emergency scene as quickly as possible
